PROFESSIONAL SUMMARY

Frontend/Full Stack Developer with hands-on experience in JavaScript, React, and Node.js for building scalable, high-performance web applications. Proven ability to translate requirements into clean, maintainable code, improve user experience, and deliver end-to-end application features in fast-paced environments.

EDUCATION

Priyadarshini College of Engineering & Technology (JNTUA)

2021- 2025

Bachelors in Electronics and communication/IT

Nellore, Andhra Pradesh

GPA: 7.9/10.00

SKILL

- Programming:** JavaScript (ES6+), TypeScript
- Frontend:** React.js, Redux, Hooks, React Router, HTML5, CSS3, Tailwind
- Backend:** Node.js, Express.js, REST API development
- Databases:** MongoDB, MySQL, PostgreSQL
- Version Control:** Git, GitHub
- Tools & Deployment:** Docker, CI/CD, Postman
- Other Skills:** API Integration, Debugging, Problem Solving, Agile/Scrum

INTERNSHIP

• SKYLLX Technologies [2]

June 2025 – pursuing

Frontend/Full Stack Developer Intern

- Developed user-friendly interfaces using React, JavaScript, and Redux, improving page performance and component reusability.
- Built RESTful APIs in Node.js and Express for data processing, authentication, and CRUD operations.
- Integrated third-party APIs and optimized backend logic, reducing API response times by 20%.
- Worked with MongoDB/MySQL to design schema models and handle database transactions.
- Used Git, GitHub, and CI/CD pipelines for version control and continuous deployment.
- Collaborated with cross-functional teams to deliver high-quality web features within agile sprints.

PROJECT

1. Full Stack Task Management App (React + Node.js)

- Developed basic frontend pages using **React, JavaScript, and functional components** for user login, task creation, and task listing.
- Created basic API routes for adding, updating, and deleting tasks while learning backend request handling.
- Worked on simple UI improvements, component reusability, and fixing bugs during testing.
- Practiced Git and GitHub for version control and collaborative tasks.

2. E-Commerce Web Application

- Built basic React pages such as Home, Product List, Product Details, and Cart using **React Hooks**.
- Implemented simple state management using **Context API** to manage cart items and product data.
- Improved the UI using CSS/Bootstrap and ensured responsive layouts for mobile screens.
- Tested the application for smooth navigation using React Router.

3. Real-Time Chat Application

- Implemented message sending, receiving, and live updates using Socket.io events.
- Tested chat features in multiple browser tabs to verify real-time functionality.
- Stored temporary chat data in-memory while learning about possible database integration.
- Used GitHub for project management and deployment practice.

CERTIFICATIONS

- JavaScript (Advanced) – Udemy /Coursera
- React Developer Certificate – Meta / Coursera
- Web Developer Intern Certificate – Deeksha Technologies
